

Words That **the Dutch** Borrowed From Other Languages

This graph shows almost 300 core loanwords in the Dutch language listed in the World Loanword Database. The World Loanword Database is a project sponsored by the Max Planck Institute for Evolutionary Anthropology. Notably, around 19% of this vocabulary is either **clearly borrowed** or **probably borrowed** from languages such as French, Latin, and German.

^ shows words that have French Picard roots
+ shows words that have Low German roots (vs High German)
